

Joyal Seban

Eager and motivated student with a passion for software engineering and innovation. Proficient in various programming languages and methodologies, with a keen interest in designing and developing innovative solutions. Committed to continuous learning and excellence, I thrive in collaborative, cross functional teams. Excited to apply my skills and contribute to impactful projects in a dynamic software development company. Let's connect and explore how I can be a valuable addition to your team!

Work Experience

2024 March – current
Python Developer Intern
Techwingsys - Ernakulam

Education

June 2023 – June 2024
Diploma in Computer Engineering
Government polytechnic collage – Manantavady

Projects

Hospital Management System

- Developed a comprehensive platform for streamlined hospital operations, focusing on patient payment processing, appointment management, and report generation
- Enhanced patient experience with real-time access to appointment reports and secure online payments.
- Utilized a robust tech stack: **Backend** - Django, Python; **Frontend** - HTML, CSS, JavaScript, Bootstrap 5; **Database** - SQLite.

Car Rental service

- car rental operations, focusing on vehicle booking management, user registration, and payment processing.
- Backend - Django, Python; Frontend - HTML, CSS, JavaScript, Bootstrap 5; Database - SQLite.

Internship

Maxlore Innovations | calicut

- Developed interactive and dynamic websites using Django and Python, implementing robust user authentication
- Managed and optimized databases with MySQL ensuring efficient data storage, retrieval, and performance.
- Successfully created a user authentication system, demonstrating the ability to integrate complex functionalities into web applications.
